

IOSH Managing Safely

Course Objectives

This course is designed for managers and supervisors who need to manage safely and effectively. The course equips delegates with the knowledge and skills required to

- Apply effective management practices to health and safety issues
- Set practicable objectives and monitor progress
- Recognise hazards and identify control measures
- Understand behavioural factors affecting performance
- Ensure that adequate training and supervision is provided for all employees
- Investigate incidents and take appropriate remedial action
- Communicate effectively on health and safety issues
- Understand legal responsibilities and how to comply

Course Content

- Generally the course covers
- Health and Safety Law
- Recognition and Control of Workplace Hazards
- Human factors and safety performance
- Effective communication

Who Should Attend

Any managers or supervisor required to manage safely and effectively in order to comply with statutory requirements, organisational policy and industry best practice.

Assessment

The course will be run by tutors from Normandie Health & Safety Ltd. At the end of the course there will be a written multi-choice paper and a practical assessment involving a short work related project. Successful candidates will be awarded a certificate from the Institution of Occupational Safety and Health (IOSH), a recognised qualifications for managers and supervisors.
